

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	SWTID-2026-7019
Project Name	EduGenie – AI Learning Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A school student preparing for exams	Understand a difficult concept quickly	Textbooks and search results are long and full of hard words	Most explanations are not written for my level	Confused and stressed
PS-2	A student with long notes and little time	Revise a full chapter before a test	Reading all my notes again takes too much time	I have many subjects and the exam is close	Overwhelmed and short on time
PS-3	A student who wants to check my learning	Test whether I have really understood a topic	I do not have ready practice questions	Making my own questions is slow and a teacher is not always available	Unsure about my preparation
PS-4	A beginner who wants to learn a new skill like SQL or Python	Know what to learn first and in what order	There are too many videos and articles to choose from	I do not have a clear step-by-step roadmap	Lost and losing motivation
PS-5	A student with a doubt outside class hours	Get a quick, clear answer to my question	My teacher and friends are not available at that time	Searching online gives many pages and mixed answers	Stuck and frustrated
