

Communication

Date	29 September 2026
Team ID	SWTID-2026-7019
Project Name	EduGenie – AI-Powered Learning Assistant
Maximum Marks	1 Mark

Communication:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.N o	Communication Type	Frequenc y	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Team chat group	All team members	Share yesterday's progress, today's plan and blockers
2	Progress Update	Weekly	Video call (Google Meet)	All team members	Review completed modules and plan the next milestone
3	Issue / Bug Discussion	As Needed	GitHub Issues / team chat	Developers involved	Report, discuss and fix bugs in the API modules and UI
4	Stakeholder Review	Bi-Weekly	Video call / email	Team + mentor	Get feedback on features and project documentation
5	Final Demo Rehearsal	Once	Video call (screen share)	All team members	Practise the demo flow and timing before submission
6	Code Updates	Per change	GitHub repository	All team members	Keep source code in sync and track changes

Communication Challenges & Resolutions:

S.N o	Challenge Faced	Resolution / Action Taken
1	Sharing the Gemini API key safely across team members	Kept the key in a local .env file (excluded by .gitignore); each member used their own key, with .env.example as the template
2	Different local setups causing "works on my machine" errors (Python paths, large model download)	Documented run steps, pinned dependencies in requirements.txt and added a Gemini fallback when the local model is unavailable
3	Coordinating schedules and keeping everyone aligned on feature status	Fixed daily standup and weekly review slots; tracked tasks and bugs through GitHub
